

Drywell Registration Form (Revised 2/2004)

Thank you for taking steps to comply with the drywell registration program. This form must be submitted by any person who owns a drywell used for storm water disposal as required by Arizona Revised Statutes (A.R.S.) §49-332.

Please submit a signed copy of the registration form and a fee of \$10 for each drywell to:

Arizona Department of Environmental Quality
Residential & Industrial Wastewater Unit
1110 West Washington, 5th Floor
Phoenix, Arizona 85007

Upon receipt of the form and fee payment, the drywell(s) is/are considered registered and registration number(s) will be assigned by ADEQ. Please complete all sections of the form to the best of your ability. If some of the requested information cannot be supplied, or if additional details may clarify the status of your drywell, please attach written explanation to the registration form. If you have any questions regarding the drywell registration process, please call (602) 771-4686.

CHANGE OF INFORMATION:

You may change existing drywell registration information (such as new ownership, new nature of business, or decommissioning) by sending a request, in writing, to the address above. Please include the drywell registration number(s), the name of the facility, and the requested changes in your letter.

PERMITTING REQUIREMENTS:

Drywells can only receive storm water runoff or discharges that are exempt per A.R.S. §49-250. If other fluids have been directed to the drywell, it is subject to Aquifer Protection Permit (APP) and/or closure requirements and may be considered an underground injection well that requires both ADEQ and USEPA permitting. Spills to the drywell may also trigger permitting, clean closure, or enforcement actions.

An APP is required for any drywell located in an area where hazardous substances are used, stored, treated or loaded. **The permitting requirement may not apply if the Site Plan clearly demonstrates that the site is graded or engineered such that drywell(s) cannot receive runoff or spills from chemical handling areas.**

DECOMMISSIONING/CLOSURE

If a drywell is being decommissioned and is not registered, fill out this registration form and indicate that the drywell has been decommissioned in Part F.

INSTRUCTIONS:

Include a **Site Plan** with the location of the drywell accurately depicted. Often a site plan may be obtained from city building permit departments that issue an "approval to construct". If a facility is/ or will conduct industrial activities (i.e., activities fall under items 03b through 10 in Section E, Nature of Business), the Site Plan must clearly indicate all hazardous material handling areas (waste or product storage tanks or areas, fuel pumping areas, etc.) The plan should also show the drainage flow around such areas in relation to the drywell. **If applicable, describe and depict any engineered structures or secondary containment that will prohibit chemical spills and leaks from reaching the drywell.** This information may eliminate the need for an APP for your drywell.

A. Provide a name by which the facility/property may be referred to in all correspondence. The location address can be a street address or a description in relation to major streets, (e.g., 1/4 mile east of Major Street on Minor Road).

B. Indicate the owner of the drywell, the business name and address. If the *property owner* is different than the drywell owner, please provide information for the property owner, including a contact name, business name and mailing address.

C. Indicate the technical contact person (engineer, environmental consultant, or contractor). This is whom ADEQ will contact with registration questions.

D. Give the location of the facility (not each drywell) in the Township, Range format (cadastral location). Break the Section down to a 2.5-acre parcel, if possible (1/4, 1/4, 1/4, 1/4). This information can typically be obtained from deed information or the County Recorder or Assessor's Offices.

E. Check all categories, which best describe the activities conducted at the facility/property. If 'other', please provide details. A complete description will minimize requests for additional information.

F. Complete **Table F**. Designate a name or number by which each drywell can be permanently referenced. Check the type of areas that drain into each well. **Indicate if the drywell(s) drain an area where hazardous substances are used, stored, loaded or treated (THIS ROW MUST BE COMPLETED).** If the drywell receives fluids other than storm water, please describe. Submit additional form(s) if registering more than 7 drywells.

The registration form is to be signed by the owner of the drywell or an authorized agent or general contractor with permission to sign on behalf of the owner.

Indicate that the following attachments have been included with this form:

- ☐ Site Plan with Accurate Location of Drywell, Showing Drainage Details
☐ \$10 Registration Fee for Each Drywell

Facility Information

A. **Facility Project Name** _____
Location Address _____
 _____ Zip Code _____

B. **Well Owner Name** _____
Business Name _____
Mailing Address _____
 _____ Zip Code _____
Telephone Number () _____

Property Owner Name (If different than Drywell Owner) _____

Business Name _____
Mailing Address _____
 _____ Zip Code _____
Telephone Number () _____

C. **Technical Contact Person (Engineer, Contractor or Consultant)** _____
Business Name _____
Mailing Address _____
 _____ Zip Code _____
Telephone Number () _____

D. **Facility Location:** Township _____ Range _____ Section _____, ¼ ¼ ¼
